Helped Increase Farmers' Income

How Increased Farm Income Affects Food Prices

Average Retail Cost of 42 Foods in 51 Large Cities
1913 - 100%

Agricultural Adjustment in Texas

AAA EXHIBITS FOR STATE AND COUNTY FAIRS

The above exhibit may be made more effective through the use of bright colors, moving dramatizations on an endless belt or revolving drum, lights timed to flash on and off, illuminated charts, tint block effects, cutouts, models, reverse lettering, etc.

The material on the right panel, "How Increased Farm Income Affects Food Prices", may be obtained from "Retail Prices", published semi-monthly by the Bureau of Labor Statistics, U. S. Department of

Labor. The material on the center panel is available in state offices. Material on the left panel, "How Increased Farm Income Affects Business" can be obtained from sources listed on the attached sheets.

County adaptations might include figures on local income, local commodity prices, county figures on tax payments, increases in the value of farm real estate, county passenger car registrations, etc.
